PERFORMANCE DESCRIPTOR / STANDARD	6.E.2B.	Conceptual Understanding: The complex patterns of changes and movement of water in the atmosphere determined by winds, landforms, ocean temperatures and currents, and convection are major determinants of local weather patterns and climate. Technology has enhanced our ability to measure and predict weather patterns.

KNOWLEDGE AND SKILLS / ESSENTIAL QUESTION	6.L.4.	The student will demonstrate an understanding of how scientists classify organisms and how the structures, processes, behaviors, and adaptations of animals allow them to survive.
PERFORMANCE DESCRIPTOR / STANDARD	6.L.4A.	Conceptual Understanding: Life is the quality that differentiates living things (organisms) from nonliving objects or those that were once living. All organisms are made up of cells, need food and water, a way to dispose of waste, and an environment in which they can live. Because of the diversity of life on Earth, scientists have developed a way to organize groups of organisms according to their characteristic traits, making it easier to identify and study them.
GRADE LEVEL EXAMPLE / STAGE		Students who demonstrate this understanding can:

PERFORMANCE DESCRIPTOR / STANDARD	6.L.4B.	Conceptual Understanding: The Animal Kingdom includes a diversity of organisms that have many characteristics in common. Classification of animals is based on structures that function in growth, reproduction, and survival. Animals have both structural and behavioral adaptations that increase the chances of reproduction and survival in changing environments.

STANDARD / COURSE	SC.6.L.	LIFE SCIENCE: DIVERSITY OF LIFE-PROTISTS, FUNGI AND PLANTS
KNOWLEDGE AND SKILLS / ESSENTIAL QUESTION	6.L.5.	The student will demonstrate an understanding of the structures, processes, and responses that allow protists, fungi, and plants to survive and reproduce.

PERFORMANCE DESCRIPTOR / STANDARD	6.L.5A.	Conceptual Understanding: The Protist Kingdom is one of the most diverse groups and includes organisms that have characteristics similar to but are not classified as plants, animals, or fungi. These microorganisms live in moist environments and vary in how they obtain energy and move. The Fungi Kingdom consists of organisms that do not make their own food (heterotrophs) but obtain their nutrition through external absorption. Fungi can be grouped by their growth habit or fruiting structure and respond to changes in the environmental stimuli similar to plants.
GRADE LEVEL EXAMPLE / STAGE		Students who demonstrate this understanding can:
